

Cost-effective, reliable and highly configurable system designed to address diverse customer requirements

System Benefits:

- Low Cost of Ownership
 - ◆ Up to 72 burn-in board slots
 - ◆ Small footprint
 - ◆ No side access required
 - ◆ Highly efficient power delivery
 - ◆ Low-power standby mode
- High Reliability and Uptime
 - ◆ Redundant architecture
 - ◆ Hot-swap electronics and power supplies
- Addresses Diverse Needs
 - ◆ Production burn-in and test of low-power logic and memories
 - ◆ Burn-in and test of high-power logic up to 100 W with individual device temperature sensing and control
- Highly Configurable for Production and Engineering

“Changing the Way ICs Are Tested”
